

A large red and white cargo ship sailing on the ocean, viewed from the front.A motorcyclist wearing a helmet and gear, riding a dirt bike on a sandy beach, kicking up a cloud of sand.A close-up of autumn leaves falling through the air, with some leaves caught in motion.

WIND & WEATHER LABELS

**STRONG FOR ANY ENVIRONMENT
RELIABLE SOLUTIONS FOR
OUTDOOR USE, WAREHOUSING, AND TRANSPORT**

HERMA CAMPUS

With a continuous chain of expertise that is probably unique worldwide, HERMA is able to develop the most suitable solutions for numerous industries and fields of application, from self-adhesive materials to label variants and labelling technology.

Made in Filderstadt Germany!

Short distances and state-of-the-art facilities,
from the self-adhesive material to wind and
weather labels.

This is how quality is created – from raw material to label

The adhesive material for HERMA labels is manufactured with the highest precision on state-of-the-art coating machines – for maximum printing reliability and trouble-free application. The entire production process takes place at a single location, from raw material processing to the finished label. Short distances reduce transport requirements and conserve resources. Quality, sustainability, and efficiency – Made in Germany.

Company-owned laboratory

The HERMA laboratory is a crucial part of the company, ensuring both the innovative strength and the reliability and quality of its products.

- **Driving innovation:**
Customized solutions for customer requirements are developed quickly and efficiently.
- **Guaranteeing the highest quality:**
Each batch of labels is tested to ensure that it meets strict standards.
- **Tested and approved:**
HERMA wind and weather labels run smoothly through the printer – without paper jams.
- **Speed and flexibility:**
Customer requests can be implemented quickly, and new products brought to market faster.
- **Promoting sustainability:**
Research and testing support HERMA in the development of environmentally friendly products.

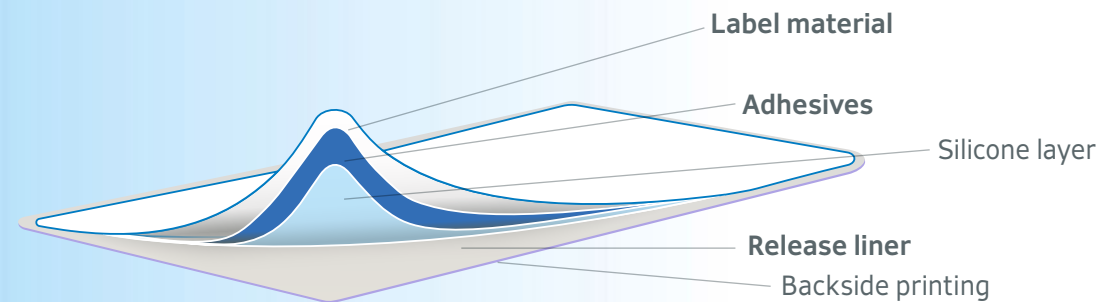

Material composite

Short distances and state-of-the-art facilities –
from adhesive material to wind and weather labels.

Adhesive materials

are ready-made composites consisting of three main components.

Label material

The labels are made of durable white film based on polyethylene, polyester, or polypropylene with good a opacity of at least 85% – no PVC for lower environmental impact!

Adhesives

The wind and weather labels use a strong adhesive, solvent-free acrylate-based adhesive – free of plasticizers and acids, and pH neutral. The adhesive also holds an ISEGA safety certificate.

Release liner

A white kraft paper, coated on one side and made from chlorine-free bleached pulp is used. Thanks to its high smoothness and coordinated back-side smoothness, it is ideal for use in laser printers and copiers.

Wind and weather labels

When labels have to withstand outdoor conditions!

- **Durable film-based label material:**

High tear and abrasion resistance: the labels made of polyethylene, polyester, or polypropylene remain intact even under mechanical stress and are therefore ideal for use in production, logistics, and laboratories – both indoors and outdoors.

- **Weatherproof label material including BS 5609 Section Two:**

The labels guarantee permanent adhesion even under extreme environmental influences. Neither severe weather nor prolonged wetness affects their adhesive strength. Even when exposed to salt water, the adhesion remains reliable. This means they meet the requirements for demanding weather conditions, including maritime applications.

- **Temperature-resistant after application: -30 °C to +80 °C (minimum)**

The labels guarantee reliable adhesion during cooling and heating processes – they do not come off in deep-freeze areas or hot storage areas. The polyethylene film labels can even withstand temperatures from -40 °C to +150 °C.

- **Strong adhesion and solvent-free:**

The acrylic-based adhesive ensures long-term reliable labeling without emitting harmful vapors – permanently safe and harmless to health.

- **Food-safe adhesive contents for safe use:**

All adhesive ingredients comply with FDA 21 CFR 175.105. This means the labels are safe for indirect food contact and can be used directly on packaging – confirmed by ISEGA certificate.

Wind and weather labels

Made for any climate!

- Ideal for heavy-duty labeling and extreme situations
- Wide range with multiple pack sizes and numerous label formats
- Weatherproof, strong adhesive and resistant to seawater and extreme temperatures

Weatherproof. Strong adhesion. Superior.

Whether sun, rain, or frost – these labels deliver what they promise. For anyone who values durable labeling: robust material, strong adhesion, and reliability in any environment. Perfect for use in production, warehouses, and outdoor applications – anywhere performance counts.

A wide range of products ensures flexible and cost-effective applications. Produced to the highest quality standards in Germany – quality that impresses!

Outdoor film labels

Assortment and application

- Extremely strong adhesion, even on critical surfaces
- Weatherproof, resistant to aging, oil- and dirt-repellent, washable, temperature resistant from -40 °C to +150 °C and seawater-resistant
- Stretchable: Ideal for adapting to curved surfaces
- High opacity: Ensures clear colors, strong contrasts, and optimal readability

For tough outdoor use.

For robust special requirements, such as outdoor applications, the label material must be 100% reliable.

HERMA outdoor labels with extra strong adhesion perform exceptionally well even under extreme conditions. They are suitable for all surfaces, including metal and plastic, and can be applied to critical substrates (such as rough, damp, cold, warm, or dusty surfaces).

KENNZEICHNEN IDENTIFICATION

- Wetterfestes Material mit extremer Haftkraft, auch auf kritischen Oberflächen
- Ideal für stark beanspruchte Etikettierung und im Außenbereich
- Weather-resistant material with extremely powerful adhesion, also on critical surfaces
- Ideal for conditions where labels are subject to high stresses as well as outdoors
- Matériau résistant aux intempéries avec une force adhésive extrême, même sur des surfaces critiques
- Idéales pour les étiquetages fortement sollicités et l'extérieur

Polyester labels

Assortment and application

- Ideal for heavy-duty labeling outdoors, in warehouses and in production, as well as for information and warning signs, etc.
- Weatherproof, UV- and aging-resistant, oil- and dirt-repellent, washable, temperature-resistant from -30 °C to +80 °C and seawater-resistant
- Tear-resistant polyester film: durable under extreme stress

Make a good impression even under difficult conditions.

Water, oil, dirt, temperature influences are no problem for labels made from white polyester film. Their durable surface withstands even heavy use – indoors and outdoors, when conventional paper labels are no longer sufficient. Strong adhesion for a wide range of applications and surfaces: property marking, shop window stickers, manufacturing and storage information, garbage cans, etc.

Inkjet film labels

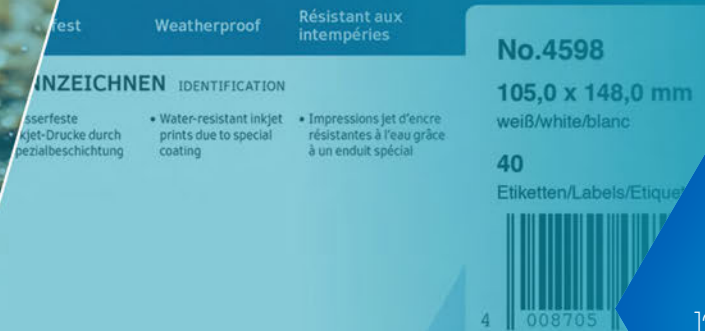

Assortment and application

- Waterproof inkjet prints thanks to special coating
- Fast drying of water-based inks
- For visually appealing outdoor labeling
- Weatherproof, temperature-resistant from -40 °C to +80 °C and seawater-resistant

Durable. Detailed. High-quality printing.

HERMA inkjet film labels deliver outstanding printing results in black and color. Thanks to a special surface coating, the labels ensure optimal ink absorption for outdoor labeling or visually appealing lettering.

Perfect labels – tailored to printing technology and application

The shape of the corners depends on the area of application. Labels with rounded corners impress with their soft, modern look and are particularly resistant to wear and tear – ideal for long-lasting labeling and decorative applications. On the other hand, if you need maximum space for content such as barcodes or addresses, choose labels with pointed corners. They offer a clear, functional look and are perfect for structured labeling in everyday office use.

The back tells the story...

The item number printed on the back of each sheet makes it easy to identify sheets that have already been removed from the package. It also ensures that the item number selected in the software matches the sheet. This reliably prevents misprints. Reordering is no problem either, even if you only have one sheet left.

HERMA Label Assistant Online

LAO: design online, print locally

No download required, available 24/7

Select format, customize label, print PDF – done

Always up to date with all HERMA label formats

Design assistant: step by step to the finished label, with preview function

Upload your own photos or logos, visible in real preview on screen

A wide range of design templates that can be customized
Ready to use:
select a design and label format, design, print!

Serial printing of address labels from Excel – in just 3 steps to the result

A wide range of application topics, including:
address labels and shipping instructions, file and CD labels, gift and greeting labels, bottle labels

Video tutorials and help videos available on our homepage

Free, easy and fast: www.herma.com/lao

HERMA labels are of high-quality and can be individually printed. The software enables simple, fast and professional design. It saves time, delivers perfect results and is ideal for private and professional use – for individual labels in top quality.
